Current emergency and recovery programme standards

Published 14 January 2021
Introduction

In response to the Covid-19 pandemic, we developed a set of emergency standards for nursing and midwifery education.

These standards aimed to provide approved education institutions (AEIs) and their practice learning partners with the flexibility to enable students within their second and third/final year to support the workforce. Students were able to make use of their knowledge and skills while continuing their programmes and meeting their learning outcomes.

With the pandemic continuing we phased out the majority of the emergency standards on 30 September 2020 to support students returning to their normal studies and supernumerary placements. We identified a number of emergency programme standards which were retained as recovery standards.

With the pandemic continuing to put enormous pressure on health and care services, it remains our priority to ensure that students are supported to complete their studies and graduate when expected.

Following a request from the Secretary of State for Health and Social Care we have re-introduced a set of emergency standards that enables final year nursing students (not including those in their final year of a two year post graduate diploma programme) to undertake up to 100 percent of their time in clinical practice, whilst that standard remains in effect. Each country will need to decide whether they wish to adopt these standards locally.

We also recognise that in some regions of the UK it may not be possible for first year students to remain in practice as normal. We have therefore agreed to reinstate the emergency standard which allows first years to complete their year in academic and online learning where their normal placements cannot be supported (Emergency Standard E3). As the emergency and recovery standards are optional it will be up to each AEI to determine if their adoption is needed, and where normal education can continue this should occur.

We have also re-introduced some additional flexibility around the Standards for student supervision and assessment (Emergency Standard E5.1).

We will continue to monitor the pandemic, working closely with stakeholders and the sector should further emergency standards need to be re-instated, or additional recovery standards be added.
The following emergency standards apply to final year nursing programmes

Emergency standard

EN1. Students in the final year of their undergraduate pre-registration nursing programmes may undertake up to 100 percent of their programmes in clinical placements whilst this emergency standard is in effect. All learning outcomes must be met to complete the programme.

Note: This will not apply for those in their final year of a two year post graduate diploma programme.

Standard superseded by emergency standards

Standards for pre-registration nursing education (2010):

Approaches to learning

Overall the programme requires 50 percent theory (2,300 hours) and 50 percent practice (2,300 hours), with some flexibility in each part of the programme. AEs determine the nature of theoretical learning, which may include independent study.

R5.2.3 AEs must ensure there are at least 2,300 hours of practice learning. Overall the programme requires 50 percent theory (2,300 hours) and 50 percent practice (2,300 hours), with some flexibility in each part of the programme. AEs determine the nature of theoretical learning, which may include independent study.

R5.3.4 Programme providers must ensure that there is a period of practice learning of at least 12 weeks towards the end of the programme.

R5.3.5 Programme providers must ensure that the 12-week period of practice learning enables safe judgements to be made regarding the achievement of the required standards of competence for safe and effective practice for entry to the NMC register.

R5.3.6 Programme providers must ensure an equal balance between theory and practice learning is achieved by the end of the programme.
Standards for pre-registration nursing programmes (2018):

2. Curriculum Approved education institutions, together with practice learning partners, must:

2.9 ensure the curriculum provides an equal balance of theory and practice learning using a range of learning and teaching strategies.

Emergency standard

EN1.1 Students must not have spent more than two thirds of the 4600 programme hours on practice placement.

Standard superseded by emergency standards

N/A

Emergency standard

EN1.2 Students in placements under standard EN1 will be provided with protected learning time.

Standard superseded by emergency standards

Standards for pre-registration nursing education (2010):

R4.6.1 Programme providers must ensure that students are supernumerary during all practice learning. Supernumerary means that the student will not, as part of their programme of preparation, be contracted by any person or body to provide nursing care.

Standards for pre-registration nursing programmes (2018):

3. Practice learning Approved education institutions, together with practice learning partners, must:

3.7 ensure that students are supernumerary.
The following emergency standards apply to all nursing and midwifery students in their first year.

**Emergency standard**

**E3.** Students in the first year of pre-registration undergraduate programmes who continue with their nursing and midwifery programme may spend 100 percent of their year in theory/academic learning.

**Standard superseded by emergency standards**

N/A
The following emergency standards apply to all programmes

**Emergency standard**

_E5.1._ Exceptionally, the same person may fulfil the role of practice supervisor and practice assessor during this emergency period. The assessment is to be conducted by a registered nurse, midwife or nursing associate with suitable equivalent qualifications for the programme the student is undertaking, and who is not on a temporary register.

**Standard superseded by emergency standards**

Standards for student supervision and assessment (SSSA, 2018):

Assessment of students and confirmation of proficiency

7.10 practice assessors are not simultaneously the practice supervisor and academic assessor for the same student.
### The following recovery standards apply to all programmes

Recovery standard

**R4.** Where students currently have 12 weeks to meet any outstanding outcomes, under these exceptional circumstances there will be an unlimited period for these to be met.

Standard superseded by recovery standards

**SPNE (2010)**

Standard 3: Selection, admission, progression and completion

**R3.10.2** AEIs must ensure that, where exceptional circumstances prevent all outcomes being achieved within the assessed period for that part of the programme, any outstanding outcomes are met and confirmed within 12 weeks of the student entering the next part of the programme. The 12-week period includes holidays and any absences. Reasonable adjustments may be applied for students with a disability.

**R3.10.3** AEIs must ensure that students who fail to achieve the outstanding outcomes within the 12-week period must, depending on local assessment policy, either return to the previous part of the programme to meet the shortfall, or be discontinued.

**SPME (2009)**

Standard 15: Assessment strategy

Clinical practice must be graded and be counted as part of the academic award. All outcomes within a progression point period (for example an academic year) have to be achieved and confirmed within 12 weeks of entering the next academic level. All assessments must be completed and have been passed prior to successful completion of the programme. This is designed to confirm that the student has the theoretical knowledge, practical skills and attitude to achieve the standards required for entry to the midwives’ part of the register.
The role of the Nursing and Midwifery Council

What we do

Our vision is safe, effective and kind nursing and midwifery that improves everyone’s health and wellbeing. As the regulator of almost 725,000 nursing and midwifery professionals, we have an important role to play in making this a reality.

Our core role is to regulate. First, we promote high professional standards for nurses and midwives across the UK, and nursing associates in England. Second, we maintain the register of professionals eligible to practise. Third, we investigate concerns about nurses, midwives and nursing associates—something that affects less than one percent of professionals each year.

To regulate well, we support our professions and the public. We create resources and guidance that are useful throughout people’s careers, helping them to deliver our standards in practice and address new challenges. We also support people involved in our investigations, and we’re increasing our visibility so people feel engaged and empowered to shape our work.

Regulating and supporting our professions allows us to influence health and social care. We share intelligence from our regulatory activities and work with our partners to support workforce planning and sector-wide decision making. We use our voice to speak up for a healthy and inclusive working environment for our professions.

The Recovery Standards were approved by Council on 2 July 2020

The re-introduction of Emergency Standards E3 and E5.1 were approved by Council on 8 January 2021

The introduction of Emergency Standards EN1, EN1.1 and EN1.2 were approved by Council on 13 January 2021
