

**Nursing and Midwifery Council
Investigating Committee**

**New Interim Order Hearing
Wednesday 8 June 2022**

Virtual Hearing

Name of registrant: Hannah Mogg

NMC PIN: 15K2269E

Part(s) of the register: Registered Nurse
Children – RNC- October 2016

Relevant Location: Birmingham

Panel members: Ingrid Lee (Chair, Lay member)
Aileen Cherry (Registrant member)
Alison Fisher (Lay member)

Legal Assessor: John Donnelly

Hearings Coordinator: Renee Melton-Klein

Nursing and Midwifery Council: Represented by Adam Slack, Case Presenter

Miss Mogg: Not present and not represented at the hearing

Interim order directed: **Interim suspension order (18 months)**

Decision and reasons on interim order

The panel decided to make an interim suspension order for a period of 18 months.

Unless Miss Mogg's case has already been concluded or there has been a material change of circumstances, a panel will review the interim suspension order at a review meeting within the next six months and every six months thereafter. A panel will be invited by the NMC to confirm the interim suspension order at this meeting and Miss Mogg will be notified of the panel's decision in writing following that meeting.

Where there has been a material change of circumstances that might mean that the order should be revoked or replaced, or there has been a request for an early review, a panel will review the interim order at a hearing which Miss Mogg will be invited to attend in person, send a representative on Miss Mogg's behalf or submit written representations for the panel to consider. At any such review hearing the panel may revoke the interim order, it may confirm the interim suspension order or it may replace it with an interim conditions of practice order.

The NMC Case Examiners are yet to decide whether there is a case to answer in relation to the allegation made against Miss Mogg. The NMC will write to Miss Mogg when the case is ready for the next stage of the fitness to practise process.

This will be confirmed to Miss Mogg in writing.

That concludes this determination.
