## Decision and reasons on interim order

The panel decided to confirm the current interim conditions of practice order.

The panel has determined that the following conditions are proportionate and appropriate:

  - a) Working at all times on the same shift as, but not always directly observed by a registered nurse.

8. You must immediately give a copy of these conditions to:
  - a) Any organisation or person you work for.
  - b) Any employers you apply to for work (at the time of application).
  - c) Any establishment you apply to (at the time of application), or with which you are already enrolled, for a course of study.
  
9. You must tell your case officer, within seven days of your becoming aware of:
  - a) Any clinical incident you are involved in.
  - b) Any investigation started against you.
  - c) Any disciplinary proceedings taken against you.

10. You must allow your case officer to share, as necessary, details about your performance, your compliance with and / or progress under these conditions with:
  - a) Any current or future employer.
  - b) Any educational establishment.
  - c) Any other person(s) involved in your retraining and/or supervision required by these conditions.

Unless your case has already been concluded, this interim order must be reviewed before the end of the next six months and every six months thereafter. Additionally, you or the Nursing and Midwifery Council (NMC) may ask for the interim order to be reviewed if any new evidence becomes available that may be relevant to the interim order.

At any review a panel may revoke the interim order or any condition of it, it may confirm the interim order, or vary any condition of it, or it may replace the interim conditions of practice order with an interim suspension order.

The NMC Case Examiners have reviewed the investigation and decided that the matter could be dealt with by undertakings and there are currently discussions taking place with yourself regarding the required undertakings.

This will be confirmed to you in writing.

That concludes this determination.
