Summary of review and findings

The University of Birmingham (UoB), school of nursing (the school), an approved education institution (AEI), presents a major modification to the pre-registration nursing programme. The modification proposes changes to the module learning outcomes in the three-year full-time Bachelor of nursing with Honours (BNurs (Hons)), the four-year full-time Master of nursing (MNurs), and the two-year full-time postgraduate Master of science (MSc). The proposal for the MSc route involves 60 academic credits and a structural change.

The pre-registration nursing programme was approved by the Nursing and Midwifery Council (NMC) on 15 August 2019. The undergraduate BNurs and MNurs routes have adult, mental health and children's single fields of nursing. There are two MNurs two dual field routes; adult and mental health, and children's and mental health. The MSc routes include adult, mental health and children's fields. A major modification was approved on 15 July 2020 to transfer adult, mental health and children's students on the MNurs programme under the Standards for pre-registration nursing education (NMC, 2010) onto the Standards for pre-registration nursing programmes (SPNP) (NMC, 2018).

No changes are proposed to the mapping against the SPNP and Future Nurse: Standards of proficiency for registered nurses (FN:SPRN) (NMC 2018).

Programme documentation and a remote meeting with members of the programme team and head of the school evidence partnership working between the AEI and key stakeholders, practice learning partners (PLPs), students and service users and carers (SUCs). There's support from all stakeholders for the changes to modules.

The modification process confirms that arrangements at programme level meet the Standards framework for nursing and midwifery education (SFNME) (NMC, 2018) and the Standards for student supervision and assessment (SSSA) (NMC, 2018).

The major modification is recommended to the NMC for approval.

Section three

NMC Programme standards

Please refer to NMC standards reference points:

Standards for pre-registration nursing programmes (NMC, 2018)

Future nurse: Standards of proficiency for registered nurses (NMC, 2018)

Standards framework for nursing and midwifery education (NMC, 2018)

Standards for student supervision and assessment (NMC, 2018)

The Code: Professional standards of practice and behaviour for nurses, midwives

and nursing associates (NMC, 2015 updated 2018)

Quality assurance framework for nursing, midwifery and nursing associate

education (NMC, 2020)

QA Handbook (NMC, 2020)

Partnerships

The AEI works in partnership with their practice learning partners, service users, students and all other stakeholders.

Please refer to the following NMC standards reference points for this section:

Standards framework for nursing and midwifery education (NMC, 2018)

Standard 1: The learning culture:

- R1.12 ensure programmes are designed, developed, delivered, evaluated and coproduced with service users and other stakeholders
- R1.13 work with service providers to demonstrate and promote inter-professional learning and working

Standard 2: Educational governance and quality:

- R2.2 all learning environments optimise safety and quality taking account of the diverse needs of, and working in partnership with, service users, students and all other stakeholders
- R2.4 comply with NMC Standards for student supervision and assessment
- R2.5 adopt a partnership approach with shared responsibility for theory and practice supervision, learning and assessment, including clear lines of communication and accountability for the development, delivery, quality assurance and evaluation of their programmes
- R2.6 ensure that recruitment and selection of students is open, fair and transparent and includes measures to understand and address underrepresentation
- R2.7 ensure that service users and representatives from relevant stakeholder groups are engaged in partnership in student recruitment and selection

Standard 3: Student empowerment:

- R3.3 have opportunities throughout their programme to work with and learn from a range of people in a variety of practice placements, preparing them to provide care to people with diverse needs
- R3.16 have opportunities throughout their programme to collaborate and learn with and from other professionals, to learn with and from peers, and to develop supervision and leadership skills
- R3.17 receive constructive feedback throughout the programme from stakeholders with experience of the programme to promote and encourage reflective learning
- R3.18 have opportunities throughout their programme to give feedback on the quality of all aspects of their support and supervision in both theory and practice.

Standard 4: Educators and assessors:

- R4.7 liaise and collaborate with colleagues and partner organisations in their approach to supervision and assessment
- R4.9 receive and act upon constructive feedback from students and the people they engage with to enhance the effectiveness of their teaching, supervision and assessment
- R4.10 share effective practice and learn from others

Standard 5: Curricula and assessment:

- R5.4 curricula are developed and evaluated by suitably experienced and qualified educators and practitioners who are accountable for ensuring that the curriculum incorporates relevant programme outcomes
- R5.5 curricula are co-produced with stakeholders who have experience relevant to the programme
- R5.14 a range of people including service users contribute to student assessment

Standards for student supervision and assessment (NMC, 2018)

Standard 1: Organisation of practice learning:

- R1.4 there are suitable systems, processes, resources and individuals in place to ensure safe and effective coordination of learning within practice learning environments
- R1.7 students are empowered to be proactive and to take responsibility for their learning
- R1.8 students have opportunities to learn from a range of relevant people in practice learning environments, including service users, registered and non-registered individuals, and other students as appropriate

Standard 2: Expectations of practice supervisors:

R2.2 there is support and oversight of practice supervision to ensure safe and effective learning

Standard 3: Practice supervisors: role and responsibilities:

R3.3 support and supervise students, providing feedback on their progress towards, and achievement of, proficiencies and skills

Standard 4: Practice supervisors: contribution to assessment and progression:

R4.3 have sufficient opportunities to engage with practice assessors and academic assessors to share relevant observations on the conduct, proficiency and achievement of the students they are supervising

Standard 7: Practice assessors: responsibilities:

R7.9 communication and collaboration between practice and academic assessors is scheduled for relevant points in programme structure and student progression

Standard 9: Academic assessors: responsibilities:

R9.6 communication and collaboration between academic and practice assessors is scheduled for relevant points in programme structure and student progression

Findings against the standard and requirements

Provide an evaluative summary about the effectiveness of the partnerships between the AEI and their practice learning partners, service users, students and any other stakeholders.

The AEI has an established consultation and development process. This involves student consultation and curriculum development committees that include representation from the public engagement in nursing (PEN) group and PLPs. The PEN group includes SUCs who represent people across the age span. The group is a strong advocate for responding to the student voice. The proposed programme modifications were presented at the practice-based learning group

providing opportunities for discussion and commentary with PLP representatives. There's evidence that all stakeholders are supportive of the proposed changes.

The AEI is a member of the Birmingham and Solihull learning partnership group. Initiatives which increase opportunities for working with PLPs on research, clinical governance and improvement projects are shared in this group.

Following student evaluation of modules and listening and consultation events, students and the programme team propose a modification to modules within the programme.

For the MSc route this will change the programme structure as a 40-credit module, which is presented at the end of year one, is now delivered in two 20-credit modules in years one and two. MSc students report the field specific academic level seven 40-credit module, 'advancing clinical assessment, diagnostics and decision-making', is too intensive for delivery in one block at the end of the first year of the programme (part two). Student consultation identified that they would prefer an introduction to normal clinical skills in parts one and two, and to have these skills revisited at an advanced level in part three. The change allows the team to present a research module, 'research and improvement methods for practice' (RIMP), at the end of year one instead of in year two.

Currently, different research-based modules are offered in undergraduate and masters level pre-registration nursing routes. A change proposed is to streamline this provision. A year three, academic level six, 20-credit research methods module is shared with the BNurs and MNurs single field routes. A modification is requested to update learning outcomes and assignment tasks with a particular focus on simplifying language with clear alignment of assessment and learning outcomes. A minor amendment to the assignment task allows more choice for the student.

The rationale for modifications in the MNurs single and dual fields routes are to improve student preparation in inquiry skills. There are three research/inquiry module components in years three and four. The 'research methods' module at academic level six, 20-credits, is shared with the BNurs route. At academic level seven there's the 'project management and governance' (PMRG) module, 20-credits and the 'health and social care enquiry' (HSCE) module, 40-credits.

For the MNurs single field route the proposal is to replace the PMRG module with the RIMP module. This module is designed to strengthen student understanding of inquiry/research methodology, the difference between service improvement and research and the key principles of research governance.

The dual field MNurs route includes an academic level seven, 20-credit module, 'creating and applying evidence' (CaAE). The proposal is to replace this with the RIMP module. This change provides consistency in research preparation for both single and dual field MNurs routes.

The two-year MSc route includes the CaAE module. The proposal is to replace the CaAE module with the RIMP module.

The programme team tell us that working with clinical staff who initiate service improvement projects in the health and social care sector has also influenced module changes. All MNurs and MSc students in the final year of the programme undertake the HSCE module, which enables opportunities to work collaboratively with researchers, clinicians and quality improvement teams in clinical and community settings. These practice learning environments enable opportunities for the collection and analysis of data to produce a report in live research, audit or quality improvement activities. The proposed module changes, including introducing the RIMP module in year one of the MSc routes, address the needs of students who report that they want more preparation to develop the essential skills required to undertake project work.

The programme team provide assurance that all pre-registration nursing students have had the proposed module changes presented and students are positive about the change.

No changes are required to programme structure in the BNurs or MNurs routes or to programme learning outcomes in any route.

Student journey through the programme

Standard 1: Selection, admission and progression

Approved education institutions, together with practice learning partners, must:

- R1.1 Confirm on entry to the programme that students:
- R1.1.1 are suitable for their intended field of nursing practice:
- adult, mental health, learning disabilities and children's nursing
- R1.1.2 demonstrate values in accordance with the Code
- R1.1.3 have capability to learn behaviours in accordance with the Code
- R1.1.4 have capability to develop numeracy skills required to meet programme outcomes
- R1.1.5 can demonstrate proficiency in English language
- R1.1.6 have capability in literacy to meet programme outcomes
- R1.1.7 have capability for digital and technological literacy to meet programme outcomes.
- R1.2 ensure students' health and character are sufficient to enable safe and effective practice on entering the programme, throughout the programme and when submitting the supporting declaration of health and character in line with the NMC's health and character decision-making guidance. This includes satisfactory occupational health assessment and criminal record checks
- R1.3 ensure students are fully informed of the requirement to declare immediately any cautions or convictions, pending charges or adverse determinations made by other regulators, professional bodies and educational establishments, and that any declarations are dealt with promptly, fairly and lawfully
- R1.4 ensure the registered nurse responsible for directing the educational programme or their designated registered nurse substitute are able to provide supporting declarations of health and character for students who have completed a pre-registration nursing programme
- R1.5 permit recognition of prior learning that is capable of being mapped to the Standards of proficiency for registered nurses and programme outcomes, up to a maximum of 50 percent of the programme and comply with Article 31(3) of Directive 2005/36/EC (included in annexe one of programme standards document)
- R1.6 for NMC registered nurses permit recognition of prior learning that is capable of being mapped to the *Standards of proficiency for registered nurses* and programme outcomes that may be more than 50 percent of the programme
- R1.7 support students throughout the programme in continuously developing their abilities in numeracy, literacy, digital and technological literacy to meet programme outcomes, and
- R1.8 ensure that all those enrolled on pre-registration nursing programmes are compliant with Article 31(1) of Directive 2005/36/EC regarding general

education length as outlined in annexe one in programme standards document.

<u>Standards framework for nursing and midwifery education</u> specifically R2.6, R2.7, R2.8, R2.10

Proposed transfer of current students to the programme under review Demonstrate a robust process to transfer current students onto the proposed programme to ensure programme learning outcomes and proficiencies meet the <u>Standards for pre-registration nursing programmes</u> (NMC, 2018).

Proposed transfer of current students to the <u>Standards for student</u> <u>supervision and assessment</u> (NMC, 2018).

Demonstrate a robust process to transfer current students onto the <u>Standards for</u> <u>student supervision and assessment</u> (NMC, 2018).

Standard 2: Curriculum

Approved education institutions, together with practice learning partners, must:

- R2.1 ensure that programmes comply with the NMC *Standards framework for nursing and midwifery education*
- R2.2 comply with the NMC Standards for student supervision and assessment

- R2.3 ensure that programme learning outcomes reflect the *Standards of proficiency for registered nurses* and each of the four fields of nursing practice: adult, mental health, learning disabilities and children's nursing
- R2.4 design and deliver a programme that supports students and provides exposure across all four fields of nursing practice: adult, mental health, learning disabilities and children's nursing
- R2.5 state routes within their pre-registration nursing programme that allows students to enter the register in one or more of the specific fields of nursing practice: adult, mental health, learning disabilities or children's nursing
- R2.6 set out the general and professional content necessary to meet the Standards of proficiency for registered nurses and programme outcomes
- R2.7 set out the content necessary to meet the programme outcomes for each field of nursing practice: adult, mental health, learning disabilities and children's nursing
- R2.8 ensure that field specific content in relation to the law, safeguarding, consent, pharmacology and medicines administration and optimisation is included for entry to the register in one or more fields of nursing practice
- R2.9 ensure the curriculum provides an equal balance of theory and practice learning using a range of learning and teaching strategies
- R2.10 ensure that programmes delivered in Wales comply with legislation which supports use of the Welsh language
- R2.11 ensure pre-registration nursing programmes leading to registration in the adult field of practice are mapped to the content for nurses responsible for general care as set out in Annexe V.2 point 5.2.1 of Directive 2005/36/EC (included in Annexe 1 of programme standards document)
- R2.12 ensure that all pre-registration nursing programmes meet the equivalent of minimum programme length for nurses responsible for general care in Article 31(3) of Directive 2005/36/EC (included in Annexe 1 of programme standards document)
- R2.13 ensure programmes leading to registration in two fields of nursing practice are of suitable length to ensure proficiency in both fields of nursing, and
- R2.14 ensure programmes leading to nursing registration and registration in another profession, are of suitable length and nursing proficiencies and outcomes are achieved in a nursing context.

Standards framework for nursing and midwifery education specifically: R1.9, R1.13; R2.2, R2.14, R2.15, R2.18, R2.19; R3.1, R3.2, R3.4, R3.9, R3.10, R3.15, R 3.16; R5.1 - R5.16.

Standards for student supervision and assessment specifically: R1.2, R1.3, R1.7, R1.10, R1.11

Standard 3: Practice learning

Approved education institutions, together with practice learning partners, must:

- R3.1 provide practice learning opportunities that allow students to develop and meet the *Standards of proficiency for registered nurses* to deliver safe and effective care to a diverse range of people, across the four fields of nursing practice: adult, mental health, learning disabilities and children's nursing
- R3.2 ensure that students experience the variety of practice expected of registered nurses to meet the holistic needs of people of all ages
- R3.3 provide practice learning opportunities that allow students to meet the communication and relationship management skills and nursing procedures, as set out in *Standards of proficiency for registered nurses*, within their selected fields of nursing practice: adult, mental health, learning disabilities and children's nursing
- R3.4 ensure technology enhanced and simulation-based learning opportunities are used effectively and proportionately to support learning and assessment and pre-registration nursing programmes leading to registration in the adult field of practice comply with Article 31(5) of Directive 2005/36/EC (included in Annexe 1 of programme standards document)
- R3.5 take account of students' individual needs and personal circumstances when allocating their practice learning including making reasonable adjustments for students with disabilities
- R3.6 ensure students experience the range of hours expected of registered nurses, and
- R3.7 ensure that students are supernumerary.

Standards framework for nursing and midwifery education, specifically:

R1.1, R1.3, R1.5; R2.9, R2.11; R3.3, R3.5, R 3.7, R3.16; R5.1, R5.7, R5.10, R5.12

Standard 5: Qualification to be awarded

Approved education institutions, together with practice learning partners, must:

- R5.1 ensure that the minimum award for a pre-registration nursing programme is a bachelor's degree, and
- R5.2 notify students during and before completion of the programme that they have five years to register their award with the NMC. In the event of a student failing to register their qualification within five years they will have to undertake additional education and training or gain such experience as specified in our standards.
